

Figure 1: A diagram showing the evolution of the number of nodes in a network over time. The x-axis represents time steps from 0 to 100, and the y-axis represents the number of nodes from 0 to 100. A blue line shows the number of nodes increasing from 0 to 100. A red line shows the number of nodes decreasing from 100 to 0. The two lines intersect at approximately time step 40, where the number of nodes is approximately 40. The intersection point is labeled '40.6'. The x-axis is labeled 'Time' and the y-axis is labeled 'Number of nodes'.
